Lounge Chairs

“Living in a glass house makes you design pieces to look immaculate from every angle,” says Craig Bassam, who designed the BassamFellows Wood Frame Lounge Collection for his own home. Despite being conceived ‘in the round,’ the lounges are infinitely adaptable pieces, appearing as chic in downtown Manhattan lofts as they do in Connecticut modernist homes. This versatility is the result of the lounge’s rigorously conceived form, which deconstructs the bulkiness of traditional lounge seating. As such, the form is reduced to its essence — an exposed structural wood frame elevated to fine cabinetry and a system of thin, layered cushions for ultimate comfort. Within its minimal profile are seat and back cushions comprised of a variable density foam core surrounded by plush down and feather pillows that are hand sewn, tufted and welted. Lumbar and bolster cushions are comprised of down and feather fill.
